Hello YES Club -

On many occasions, I am fortunate to walk into one of my restaurants on any given day to see people gathered together partaking in happy conversation while enjoying a meal. It is one of the simple beauties of owning restaurants. However, when the YES club walked in for lunch a few weeks ago and gathered around a table to share time together, there was something different happening. Not only were there conversation, smiles and laughter, there was a sense of enthusiasm that energized the entire atmosphere of the restaurant.

That enthusiasm was irresistible and I had to learn more. Over the past month I have learned that this club is making an impact not only on the individual who is involved with the club but also for the entire community. The club is a positive force for good, a positive force for change in and around Rockford. I commend Professor C and the youth involved with this positive force and am happy to attempt to be a part of supporting their efforts into 2017.

Enthusiastically -

Guy Bucciferro
